PROFESSIONAL SUMMARY

Detail-oriented Information Systems Engineering undergraduate with hands-on experience in **business analysis, Agile project coordination, stakeholder management, and data analysis**. Skilled in **requirements gathering and analysis, requirements documentation, user story development, sprint planning, and project coordination** using tools such as **Excel, Power BI, Jira, and Trello**. Eager to contribute to effective software project delivery and data-driven decision-making through a **Business Analyst or Project Management internship**.

TECHNICAL SKILLS

- Business Analysis & Project Management** — Requirements Gathering | Requirements Analysis | Requirements Documentation | User Story Development | Requirements Prioritization. | Stakeholder Management & Communication | Process Modeling | Agile Methodology & Scrum Practices | Sprint Planning & Coordination | Project Documentation | Project Coordination
- Data & Analytical Skills** — Data Analysis | KPI Tracking & Reporting | Dashboard Development | Data Visualization | Trend Analysis | Risk Analysis | Data-Driven Decision Making
- Tools & Technologies** — Microsoft Excel | Power BI | Google Sheets | SQL | Jira | Trello | Azure DevOps | Notion | Draw.io | Figma | GitHub | Microsoft Teams | Python

SOFT SKILLS

Communication, Leadership, Critical Thinking, Time Management, Adaptability, Problem Solving

PROJECTS

May 2026 – Present	MeetingMind — AI Meeting Productivity Analyzer - Developing an AI-powered meeting productivity analysis platform using NLP techniques to analyze meeting transcripts. - Extracting action items, recurring issues, and productivity insights while supporting Agile PM workflows through Jira integration. Applying Business Analysis practices, including stakeholder analysis, AS-IS/TO-BE analysis, BPMN workflow modeling, and requirement engineering. - Building a full-stack solution using Python, spaCy/NLTK, FastAPI/Flask, React, Tailwind CSS, MongoDB, and Jira API. - Technologies: Python, spaCy, NLTK, FastAPI/Flask, React, Tailwind CSS, MongoDB, Jira API
Apr 2026 – May 2026	Student Performance Dashboard - Developed an interactive Excel dashboard to analyze student academic performance using KPI tracking and data visualization techniques. - Performed risk analysis and attendance analysis using Pivot Tables, charts, and conditional formatting. - Generated KPI reports and visual insights to support performance monitoring and data-driven decision-making. - Designed dashboards to identify high-risk students and evaluate attendance trends. - Technologies: Microsoft Excel, Pivot Tables, Charts, Conditional Formatting, GitHub
Apr 2026 – May 2026	Food Ordering & Delivery System – Business Analysis Project - Conducted business analysis and requirement gathering for a Food Ordering & Delivery System using Agile methodologies. - Prepared professional project documentation, including BRD, SRS, and User Stories. Designed UML diagrams such as Use Case Diagrams and Activity Diagrams to model business workflows and system interactions. - Developed sprint planning documentation to support Agile project management practices. - Tools & Technologies: Microsoft Word, Draw.io, GitHub, Agile Methodology
May 2026 – Present	Retail Sales Analysis Dashboard – Power BI Project - Developed an interactive Retail Sales Analysis Dashboard using Power BI to visualize sales performance and business insights. - Analyzed sales, profit, regional performance, and product trends using KPI reporting and data visualization techniques. - Created interactive charts, filters, and dashboards to support data-driven decision-making. - Performed sales trend analysis and profitability tracking using Excel datasets and Power BI visualizations. - Tools & Technologies: Power BI, Microsoft Excel, Data Visualization, KPI Reporting, GitHub
Feb 2026 – May 2026	Web-Based Salon Management System Conducted requirement gathering and business analysis to identify stakeholder needs and define system requirements.

- Created **UML diagrams** and **project documentation** to support system design and development.
 - Collaborated in developing and testing a web-based Salon Management System for appointment, payment, and customer management.
- Technologies: **Java, Spring Boot, SQL Server, Draw.io, Agile Methodology**

PROFESSIONAL EXPERIENCE

Mar 2026 – Present Sri Lanka	AIESEC in SLIIT <i>Team Member – Global Talent & Customer Experience</i> • Coordinated and tracked 50+ candidate applications, ensuring efficient workflow management and timely delivery • Managed and analyzed datasets using Excel and Google Sheets to support data-driven insights and decision-making. • Engaged with stakeholders and clients to ensure clear requirement understanding and effective communication • Gathered and documented business requirements, including user stories and process flows, supporting core business analysis activities. • Streamlined data tracking processes, improved operational efficiency by 20% and reduced processing delays. • Prepared reports and maintained documentation to enhance project visibility and performance tracking
Jan 2026 – Present Sri Lanka	AIESEC in SLIIT <i>Team Member – Marketing & Content Coordination</i> • Planned and executed marketing campaigns aligned with project objectives, timelines, and deliverables. • Analyzed audience engagement data to identify trends and generate actionable insights. • Collaborated with cross-functional teams to track project progress, milestones, and deliverables. • Created and managed digital content to improve customer engagement and performance metrics. • Collected and analyzed user feedback to support strategic decision-making and process improvement. • Assisted in project planning, task prioritization, and workflow coordination in an Agile environment.

EDUCATION

Oct 2024 – Present	BSc (Hons) in Information Technology (Specializing in Information Systems Engineering) <i>Sri Lanka Institute of Information Technology</i>
Jan 2019 – Dec 2021	GCE Advanced Level – Commerce Stream <i>Vishaka Balika Vidyalyaya</i>

COURSES

Mar 2018 – Aug 2018	Diploma in Information Technology (International) & English - Awarded by Pearson College London Developed technical and communication skills in software development, database management, web technologies, Python programming, Microsoft Office applications, networking, and English communication through an internationally recognized diploma program.
